Description

Carbon fiber foam core sheets are not exactly like pure carbon fiber sheets, there is carbon fiber finish on both sides, but it's all advanced foam material inside.

If preserving strength and reducing more weight is required, a carbon fiber foam core panel has more advantages than a pure carbon fiber board. So foam core panels are used to build ultra-rigid, sturdy and lightweight structures.

Feature

- 1.High Strength, Light Weight, Environmental, Durable Nice Surface, Fashion
